LIGHTING

- IMPORTANT SAFETY GUIDES:
- Before wiring to power supply, turn off electricity at fuse or circuit breaker.
- Disconnect AC power and unplug battery before servicing.
- Consult your local building code for approved wiring and installation.
- Do not use outdoors.
- Do not let power supply cord touch hot surfaces.
- Do not mount near gas or electric heaters.
- This product must be installed in accordance with the applicable installation codes and ordinances. Proper grounding is required to ensure personal safety (where applicable).
- All service shall be performed by qualified personnel. This product must be installed and maintained in accordance with the applicable installation codes by a person familiar with the construction and operation of the product and the hazards involved.
- Equipment should be mounted in locations and at heights where it will not be subjected to tampering by unauthorized personnel.
- The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.Do not use this equipment for anything other than its intended use.

IMPORTANT:

1. When re-lamping, use only lamps specified by the manufacturer. Using other lamp types may result in transformer damage or cause unsafe conditions.
2. The battery in this unit may not be fully charged. After electricity is hooked up to the unit, let the battery charge up for at least 24 hours. Then normal operation of this unit will take effect.

INSTALLATION INSTRUCTIONS (Back mount):

1. Open face plate with a flat blade screwdriver.
2. Determine which mounting holes will be used to mount the fixture to the J-BOX, and then punch out the proper knockouts from the knockout pattern on the back panel of the housing.
3. There are two additional keyhole slots located on the top of the unit. These holes must be used when the unit is mounted to the wall.
4. Connect AC supply wires to fixture input wires. Black is for 120V; Red is for 277V; White is for neutral.
